PRODUCT LIST : beverage

WATER

PET WATER still and sparkling

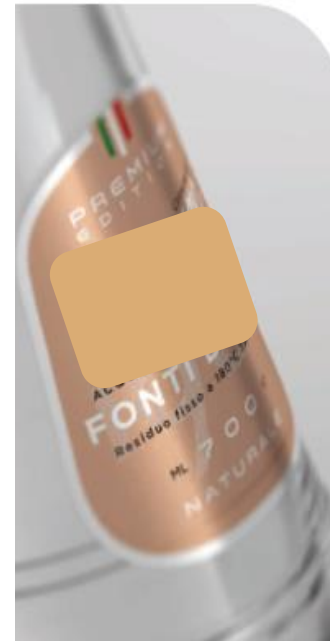

GLASS WATER still and sparkling

The water from the Fonti Bauda spring is classified as "minimally mineralized" and recognized as water with a very diuretic effect, with a perfectly balanced and neutral taste thanks to its minimal quantity of minerals. You can drink it at any time during the meal thanks to its neutral characteristic.

WATER FEATURES

Substances dissolved in 1 liter of water:
Sodium: 3,5 mg/l
Free CO2 to the source: 3,0 mg/l
Fixed residue at 180°C: 39,9 mg/l
Electrical conductivity at 20°C: 53,0 µS/cm
Total hardness: 16°F
pH at collection point: 6,8.

The new bottle, made of extra-white glass, is elegant, stylish and highly visible: this is the result of a great exercise in style by designers. The minimalist design of the label enhances the overall quality of the packaging and helps to create an exclusive image. Its metallic colors, gray for sparkling mineral water and bronze for natural mineral water, ensure a unique style.

BIRRA
LUCANA
BIANCA

Lucana Bianca is a wheat beer from Lucania, an unspoilt land rich in pure spring water. It is a beer which is light in colour but is also cloudy, with a moderate body and a slight bitterness having undergone a dry hopping process that makes it very refreshing. This beer is very spicy with notes of coriander and curacao.

It gives hints of citrus, fruity and tangy flavours but it is also smooth on the palate. This beer has the honour of being fermented in the cellar and re-fermented in the bottle with top-fermenting yeast. A special refreshing beer which is raw and unfiltered. It can complement any type of meal and can be offered between meals.

Ideal serving temperature: 5-8° C

41-46° F – EBU: 18

4,5% Alc./Vol. - Plato 10.9 - Light colored turbid

Ambient READY MEALS

Ambient ready meals

Piatti Pronti a Temperatura ambiente

The room temperature market is still very much in its infant stage, players are very few and offering very poor quality products. The line we have developed marks a major shift in quality and perception for the ambient ready meals category

For the first time, an ambient, preservative-free, product has a taste profile as good to its chilled and frozen counterparts. Our product has a 12 months shelf life, they don't need for refrigeration, so transportation costs are greatly reduced by bypassing the cold-chain distribution system.

PRODUCT LIST : *Ambient READY MEALS*

Features :

12 months shelf life from production date;
90 seconds re-heating time (directly in a microwave oven);
No need for refrigeration;
No preservative or coloring added;
Selected ingredients;
Outstanding taste and quality.
